DETAILED ACTION

Allowable Subject Matter

Claims 2-30 are allowed.

The following is an examiner's statement of reasons for allowance:

The claimed features of selecting a plurality of differing frequencies or applying to an object a plurality of light beams formed of incoherent light at a plurality of differing frequencies appears to distinguish the present application claims from being an obvious modification of the claims in parent patent US 6,648,473.

The examiner agrees with Applicant's reasoning that "individually applying differing light beams of a plurality of differing light beams to an object wherein each differing light beam has a respective selected frequency of said plurality of selected frequencies" distinguishes over the prior art.

In Applicant's remarks, filed 1/25/07, line 4, "claims 24, 27 and 29" appears to be incorrect and should read "claims 23, 27 and 29."

Regarding claim 23, the claimed feature of, "said determined frequency wherein said image criterion is selected in accordance with a light interactive property of a selected tissue" is broader in scope than the feature of claim 5, "wherein said image criterion is selected in accordance with the a absorption property of a selected tissue;" however, the limitation renders the claim allowable over the prior art of record.

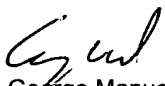

Regarding claims 27 and 29, the incorporation of the limitations of claims 13 and 15, respectively renders the claims allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
